EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology
BACHELOR OF COMPUTER SCIENCE AND DATA SCIENCE
CGPA:8.4

2022-2026

TECHNICAL SKILLS

Languages	Frameworks & Libraries	Developer Tools:
Python, Java, C, JavaScript, SQL, HTML, CSS	Flask, Streamlit, Gemini LLM, YOLOv8, Linux, Google Cloud (Basics)	VS Code, PyCharm, Jupyter Notebook, Tableau, Git, GitHub

PROJECTS

AI Interviewer | Python, Streamlit, Gemini API, Google STT, gTTS, OpenCV

- Built an AI-powered mock interviewer that records voice responses, transcribes them using Google STT, analyzes answers via Gemini LLM, and generates personalized PDF feedback reports.
- Integrated webcam, voice input, LLM evaluation, gTTS voice feedback, and real-time UI using Streamlit to simulate realistic interview experiences.

Resume Analyzer | Python, Streamlit, GenAI, FPDF

- Built an AI-powered web app that analyzes PDF resumes, matches them to job descriptions, computes scores, and generates professional PDF feedback reports using Streamlit and FPDF.
- Engineered an intuitive UI with PDF parsing via PyMuPDF/pdfminer and integrated additional features including missing keyword detection, market insights, and personalized career suggestions.

Urban Expansion Forecasting in Telangana | ML, DL, XGBoost, LSTM, CLIP, MODIS, Sentinel

- Forecasted Land Use and Land Cover (LULC) changes for 2030–2040 using remote sensing data (MODIS, Sentinel) and models like XGBoost, LSTM, and CLIP Transformer.
- Applied advanced geospatial and predictive techniques to support sustainable urban planning and deliver actionable insights for land management policies.

ExploVR | React.js, Node.js, MySQL, Google Maps API, Machine Learning

- Developed an immersive travel web application integrating VR to offer virtual tours of global destinations, enhanced by a chatbot powered through API integration.
- Implemented React.js for frontend, Node.js for backend API development, and MySQL for data management; added a personalized recommender system and VR video integration.

Serenova AI | Python, Flask, TensorFlow, NLP, HTML5 Canvas

- Developed a closed-loop digital therapeutics web application that evaluates multimodal user data to diagnose acute stress and autonomously deploy real-time, interactive relief modules.
- Implemented a Flask backend integrating a hybrid LSTM and Dense Neural Network (95% accuracy), paired with a responsive HTML5 Canvas frontend for rendering adaptive therapy games.

ACHIEVEMENTS

GEENOVATE 2K25 National Hackathon (Winner)

- Won 1st place for building a Smart Interview Analyzer, an AI-driven platform offering real-time feedback and personalized coaching.
- Completed end-to-end development in 36 hours, delivering intelligent guidance for student interview preparation.

GenAI & Cybersecurity Hackathon– GRIET × IEEE × AIMER (2nd Place)

- Secured 2nd place for developing JobFit Tracker, an AI-powered resume analyzer using Gemini LLM, Streamlit, and gTTS.
- Implemented real-time skill gap detection and personalized audio feedback to improve job readiness.

CMR THINKFEST 2.0– National Hackathon (Top 10 Finalist)

- Selected among 450+ participants and 150+ teams across 10+ states as a Top 10 finalist.
- Developed AI Interviewer, a multilingual voice-based AI assistant enabling candidates to practice and improve interview skills.
- Built features like real-time response capture, AI-driven feedback, and instant performance reports aligned with SDG goals

EXTRACURRICULAR

AAC– Tech Club, GRIET | Member 2022– Present

- Contributed to ML/DL projects and organized AI-focused events at Gokaraju Rangaraju Institute of Engineering and Technology.
- Coordinated hackathons, workshops, and peer learning sessions to build a tech-driven student community.

Entrepreneurship Workshop– IIT Hyderabad | Participant

- Completed a 2-day workshop focused on entrepreneurship, innovation, and early-stage business strategy.
- Gained practical skills in ideation, product validation, and startup development.
